L2P PEDESTAL

Simplicity and Intelligence in Fuel Management

Link2Pump is a complete high-tech solution to control commercial fleets fueling. Whether you have a fueling pump on your yard, in the back of your fuel truck or used with mobile tanks, our device captures and sends all data wirelessly to your online account. You can access real-time information from any device, anywhere. Bring reliability to your data and secure one of the most valuable assets of your cost structure.

WIRELESS FUEL MANAGEMENT

Wireless data synchronization. No time-consuming flash drives or infrastructure work needed for data cables.

ON-SITE & MOBILE APPLICATIONS

Compatible with all mechanical, digital and electronic dispensers in any fueling islands, tank trucks and mobile tanks.

WEB-BASED SOFTWARE

No computer-based software installed, no IT resources needed, no minimum requirements. Access your account from any device, anywhere.

ELIMINATE FUEL THEFT

Secure fuel from unauthorized use and set customized access restrictions.

UNLIMITED USERS AND DATA

Manages and tracks unlimited drivers, vehicles, portal users, departments and more. Dice up data in-portal, into a spreadsheet or integrate it with other systems via open API

REAL-TIME INFORMATION

Know exactly who's fueling how many gallons into what asset as it happens.

LIFE-TIME WARRANTY

No questions asked, Overnight shipping* and plug-and-play parts.

INVENTORY MANAGEMENT

Online reporting, delivery planning insights and email alarms on fuel inventory.

ADMIN HOURS RELOCATION

Save time in the tracking and reporting process to focus on more valuable work.

OFF-ROAD REBATE REPORTS

Easily manage and track off-road use and file for rebates quickly and on-time.
