

LINK2 PUMP

Simplicity and Intelligence in
FUEL MANAGEMENT

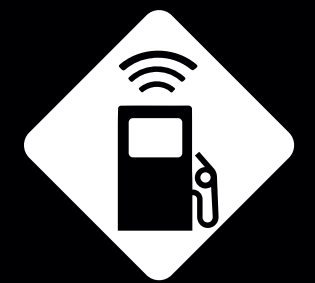

About Us

**LINK2
PUMP**

USA

Link2Pump services accounts all across the US, helping businesses to save human and financial resources in the fuel tracking and reporting process. By automating and managing fuel dispensing from bulk storage tanks, we turn a complex process into a simple experience.

**CTA
SMART**

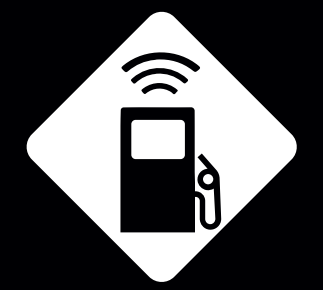

LATIN AMERICA

Early in 2020, we teamed up with **CTASmart** a multinational leader in fuel management from Brazil, aiming to extend our culture of simplicity and intelligence to Latin America and worldwide.

1,500+ Fuel systems
installed globally

600,000+ assets
tracked monthly

Our Solutions

ON-SITE APPLICATIONS

Link2Pump Pedestal automates the fueling process on-site, capturing data points you need and sending them to your online account in real-time. Account access is available from any device, anywhere, any time.

Fully compatible with mechanical, digital and electronic dispensers, each unit controls up to 4 fueling points and features extensive data input options and restriction capabilities.

MOBILE APPLICATIONS

Link2Pump Mobile packs the same technological power from L2P Pedestal into a compact enclosure to fit fuel trucks, tanker trucks or any kind of mobile tanks.

Whether used solo or combined with L2P pedestal, filling up equipment out in the field is safely tracked in real-time, with in-unit and cloud backup for added security.

PUMP

USA

How it works

1

L2P connects to the dispenser, allowing authorized use only

2

Enter key information like driver, vehicle and mileage

3

L2P activates the dispenser to begin fill-up

4

Once fill-up is over, data is instantly uploaded to the cloud

5

Data can be accessed from any device in real-time

Benefits

Secure fuel from unauthorized use and restrict access however necessary

Data can be accessed from any device in real-time

Save admin hours in tracking and reconciling fuel logs

Easily track and account off-road use for tax rebates

Online reporting and comprehensive insights on fuel inventory

Accurately categorize usage across departments, companies, jobs and more

Why Link2pump?

We built our SaaS solution to help companies focus more on their core business and less about low-value day-to-day tasks.

Using a cloud-based solution means flexibility to manage your assets from anywhere and however you need.

All updates and new feature releases are included and provided remotely. That means you get the latest capabilities and keep your fuel management system brand new year after year.

Our unique Life-time Warranty protects your investment and eliminates unexpected expenses. Eventual servicing the unit is simple and can be done yourself for minimum downtime.

At Link2Pump we aim to add ongoing value to our customers operations, by simplifying processes and powering data-driven decision making.

Life-time Warranty

No questions asked, Overnight shipping* and plug-and-play parts
