

Mitchell 1

Decisiv SRM Case Integration with Mitchell 1 TruckLabor Module

The integration between Decisiv SRM Case and Mitchell 1 TruckSeries provides a new level of enhanced functionality and ease of access for more effective shop management and streamlined repairs. Shops using the Decisiv SRM platform can seamlessly connect to the Mitchell 1 TruckLabor Module within TruckSeries and access standard labor estimates for thousands of operations to incorporate that information directly into the maintenance and repair event.

Mitchell 1 is a leader in mechanical labor estimates, and the TruckLabor Module provides comprehensive labor time guides that were developed using proven methodology by experienced and highly skilled individuals with extensive commercial vehicle expertise.

Upon activating the TruckLabor Module subscription within the Decisiv SRM platform, users gain access to an active link that enables them to launch it directly from any case. Clicking the link will access the TruckLabor Module, where users can create an operation and import all of the details back into SRM Case.

Some of the operations included in the Mitchell 1 TruckLabor Module are:

- Vehicle repair preparation
- Drain & refill necessary fluids
- Preventive measures
- Position, set-up, return tools and equipment

Seamlessly transition between SRM Case and the Mitchell 1 TruckLabor Module with one click access.

Click here to purchase the Mitchell 1 TruckLabor Module through the Decisiv Marketplace, or reach out to a Decisiv Account Manager via sales@decisiv.com to get started.
