Inspections

The Problem with Paper Inspections

Paper inspection forms are inefficient, inconsistently used, and create problems:

- **7** Information on paper forms can be unreliable and unreadable
- **7** Missed inspections could void a warranty, costing you money
- Updating existing inspection forms and locating completed forms is difficult and time-consuming
- 7 After updates, not everyone adopts the new form
- 7 Printing inspection forms is costly and requires physical space to store them
- Form management missteps create errors in the audit trail and increase your potential liability in legal, DOT, or manufacturers audits

Solution Overview

Decisiv SRM Inspections helps you create, track, and perform digital inspections, allowing you to reduce liability for missed compliance, streamline work for asset managers and technicians, and reduce downtime.

Plus, SRM Inspections can directly reduce unexpected repairs by enabling you to schedule downtime for inspections. Proactively manage your own inspection calendar regardless of whether the work is done internally or externally.

Any updates to your digital inspection forms are instantly available throughout your shops and service providers to ensure inspections are done uniformly.

Solution Description

There are two Decisiv SRM Inspections solution options available, so you can choose the one that best meets your needs.

Hilco Transport - Annual Inspection Repo	ort (DOT) Help
Select an outcome for all required locations to complete the inspecti	on.

The first option, as part of the Decisiv Advanced package, is perfect for fleets and asset managers who want to:

- **7** Schedule their own inspections
- Outsource inspections to their dealer service networks or independent service providers connected to the platform

This option allows you to schedule the included standard DOT inspection, reducing the time it takes for inspections to be completed. With this option you can:

- **7** Create detailed inspections using Builder in SRM Case
- **7** Schedule inspections to be performed using the maintenance scheduler in SRM Case

Define and designate inspections to be performed by the dealer service network as scheduled operations.

The second Decisiv SRM Inspections option, as part of the Decisiv Enterprise package, enables you to:

- Schedule external inspections and perform inspection work within your internal shop.
- **7** See a list of pending inspections for an asset

Plus, your internal shop technicians can perform inspections on any mobile device from any location. With this option you can:

- 7 Create inspections using Builder in SRM Case
- **7** Use DOT predefined inspection templates
- **7** Schedule inspections on the maintenance scheduler in SRM Case
- **7** Push inspections to dealer service network as scheduled operations
- Provide mobile check-in where technicians can perform digital inspections that are built using Builder in SRM Case
- **7** View a summary of incomplete inspections

Our Technical Services team provides custom support to fleets that want assistance in creating their own specific inspections.

MORE EFFICIENT OPERATIONS. LESS DOWNTIME. GO DIGITAL WITH DECISIV SRM INSPECTIONS.
