

PHILLIPS

Phillips back-of-cab digital inspection is now available for free! This inspection is available for all locations, and provides value to your customers and as well additional labor and parts revenue for your business.

Inspection Benefits

- Quick and easy back-of-cab checklist enables you to quickly identify failures and reduce downtime for your customers.
- Increase your parts sales by highlighting any failed inspections results in the estimate.
- Deliver safer vehicles for your customers while reducing unexpected downtime.

How to locate and use it?

Legacy Operations Table

- In the Find Operation box, search “3-Minute Phillips DOT Multi-Point Back-of-Cab Inspection” and click the Find Operation button. Any portion of the operation name can be used to find your new inspection. For example, Phillips, 3 Minute, Back of Cab, etc.
- Click on the “3-Minute Phillips DOT Multi-Point Back-of-Cab Inspection” operation, then click the Add Now button.
- From the Edit Operation screen, Click the blue Forms tab along the top, then the Do Inspection button. In the main Case screen, the Do Inspection link next to the operation name can also be used to access the inspection.
- Once all fields have been answered, click the Complete Inspection button.

New Operations Table

- In the Operations Table, begin by selecting Source “All” or Source “Phillips.”
- In the search bar, enter the Phillips operation “3-Minute Phillips DOT Multi-Point Back-of-Cab Inspection” and click the Search button. Any portion of the operation name can be used to find your new inspection. For example, Phillips, 3 Minute, back of cab, etc.
- To add your inspection, click on the “3-Minute Phillips DOT Multi-Point Back-of-Cab Inspection” operation from the search results.
- Click on the operation name if customization is needed on the Edit Operation screen. Or simply click on “Do Inspection” to begin the inspection.
- Once all fields have been answered, click the Complete Inspection button.

Delivering knowledgeable inspections, a better customer experience, and improved asset uptime.
